

List of Tables

Table 4.1:	Thermophysical data.....	59
Table 4.2:	Computer interface information for DVD system components.....	85
Table 6.1:	DVD deposition of silicon	125
Table 7.1:	Deposition efficiency of copper onto flat substrate	134
Table 7.2:	Deposition efficiency of copper as a function of e-beam power	144
Table 7.3:	Deposition efficiency of copper onto flat substrate	149
Table 7.4:	Deposition efficiency of copper onto stationary fibers.....	154
Table 7.5:	Variation of clustering probability with process conditions	161
Table 8.1:	Knudsen numbers for extreme experimental conditions	169
Table 8.2:	User-configurable DSMC model parameters	176
Table 8.3:	Required inputs for bimolecular collision theory model	179
Table 9.1:	Copper atom energy 2.5 cm from target	209
Table 9.2:	Copper atom energy 5.0 cm from target	209
Table 10.1:	Number of grid points used for each chamber pressure	213
Table 10.2:	DVD process simulation results	225
Table 11.1:	Enhanced DVD deposition characteristics	241
Table E.1:	Deposited vapor thickness versus location	349
