Questionnaire: MSE 4270/6270: Introduction to Atomistic Simulations

Name:

E-mail:

Major/program:

Advisor (if any):

What is your objective for taking the course? What do you hope to learn from the course? Will you be doing simulations in your research or are you interested for general education?

Have you ever done a computer simulation before? If so, give a brief description.

What is the topic/title of your thesis project (if known)?

Have you used unix/linux? If so, what is your level of experience?

What computer language(s) do you know?

What graphics software do you use for x-y plots?

Have you used your research computing account on UVa clusters?
